A diagram illustrating a process flow. On the left, there are two parallel horizontal bars: a red one on top and a blue one on the bottom. A vertical line connects the right end of the blue bar to the left end of a single gray bar on the right.

A diagram illustrating a process flow. On the left, there are two parallel horizontal bars: a red one on top and a blue one on the bottom. A vertical line connects the right end of the red bar to the right end of the blue bar. This vertical line then connects to a single gray bar on the right, which is positioned between the vertical levels of the red and blue bars.

The diagram shows two horizontal bars, one blue and one red, positioned above a grey box. Arrows point from the right end of each bar towards the grey box, indicating a flow or relationship between the bars and the box.

A diagram illustrating a process flow. On the left, there are two parallel horizontal bars: a red one on top and a blue one on the bottom. A vertical line connects the right end of the red bar to the right end of the blue bar. This vertical line then connects to a single gray bar on the right.

The diagram shows two horizontal bars, one blue and one red, positioned above a central vertical line. Arrows point from the right end of the blue bar and the left end of the red bar towards the central vertical line.
