# carbon footprint report

At BOCA we strive to keep sustainability at the core of our operation. We continue to source ingredients locally and support local farmers and fishermen. As tackling climate change becomes more pressing than ever, we have stepped up our efforts by engaging a local Carbon Consulting firm, elementsix, to calculate our 2020 and 2021 carbon footprint. This allows us to understand where our biggest emission sources are, and enables us to effectively reduce our impact on the environment, while preserving a unique, fine dining experience for our patrons. Below you can find a summary of our 2021 carbon footprint:

## total carbon footprint (cfp)

754,262 kgCO<sub>2</sub>

**boundary** - entire operations including upstream and downstream

**scopes** - all direct and indirect emissions (scopes 1, 2, and 3)

**average carbon footprint per guest** - 15.01 kgCO<sub>2</sub>

### scope 1

5.8%

48,811 kgCO<sub>2</sub>

Scope 1 emissions are direct greenhouse (GHG) emissions that occur from sources controlled or owned by the reporting company (e.g., emissions associated with fuel combustion in boilers and company fleet).

### lpg consumption

48,811 kgCO<sub>2</sub>

BOCA's entire 2020 and 2021 electricity consumption is purchased from renewable energy sources using I-RECS, offsetting this value to zero.

### scope 2

33.8%

193,983 kgCO<sub>2</sub>

Scope 2 emissions are indirect GHG emissions that occur from the generation of purchased energy (e.g., emissions associated with electricity consumption and district cooling).

### electricity consumption

0 kgCO<sub>2</sub>

### district cooling

193,983 kgCO<sub>2</sub>

### scope 3

60.4%

511,468 kgCO<sub>2</sub>

Scope 3 emissions are indirect GHG emissions that occur in the value chain of the reporting company, including both upstream and downstream emissions.

### purchased goods\*

315,987 kgCO<sub>2</sub>

### waste generated\*\*

35,715 kgCO<sub>2</sub>

### employee commutes

16,119 kgCO<sub>2</sub>

### transportation

143,522 kgCO<sub>2</sub>

### \*purchased goods

beef & lamb	43%
drinks	20%
fish & seafood	12%
dairy	7%
water	6%
others	5%
oils	5%
vegetables & fruits	1%
poultry	1%

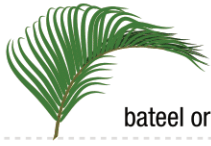

### \*\*waste generated

oil †	32%
glass	23%
organics	17%
cardboard	11%
metal	7%
plastics	3%

† As of December 2021, BOCA's used cooking oil is being recycled into biodiesel, which will reduce the emissions associated with oil waste. [www.elementsix.cc](http://www.elementsix.cc)

# local ingredients

we live in the desert, but the uae is far from being a barren land. the hajar mountains of the north are biologically rich habitats, while the central region's oases are home to modern hydroponic, organic and traditional farms, and the bounty from the arabian gulf and the indian ocean is plentiful.

## bateel organic dates

organic and sustainable dates from the al ghat region of saudi arabia.

## kingfish

did you know that hamour has a lifespan of over 20 years but because of overfishing they are only growing to a maximum age of eight years in the arabian gulf.

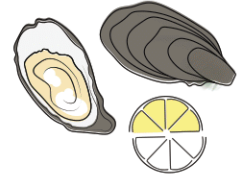

"UAE National Framework Statement for Sustainable Fisheries (2019-2030)"  
"Check out MoCCE fishing calendar here"

## ras al-khaimah

## dibba bay oysters

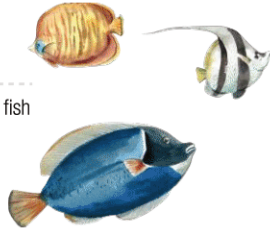

thanks to local hero, ramie murray, we now have world class oysters that we can call our own. grown in the pristine waters of dibba in northern fujaairah these oysters carry the right balance of saltiness, acidity, sweetness and 'meatiness'.

## dibba al fujaairah

## uae fishing calendar

a month by month guide to sourcing fish sustainably in the uae. head to [www.moccae.gov.ae](http://www.moccae.gov.ae) to download it now.

## umm al quwain

## ajman

## sharjah

## dubai

## khansour

a rare native plant that grows in the mountain areas of ras al khaimah, it has been recently introduced to the jebel hafeet natural reserve for conservation. blooms a dark ruby flower, this succulent is extremely bitter. it has been traditionally used in medicine and cooked in a stew. we pickle it in this menu edition.

## camel cheese

by healthy farm eatery, made from camels growing on natural feed in a private farm in sharjah.

## al dhaid

## khobez

also known as mallow, one of the more common native desert plants in the uae and across the region. it has an unmistakable long petiole (the stalk that attaches the leaf to the stem) with a circular to kidney-shaped and toothed leaf. the taste is mildly bitter. we use it fresh and in a puree form.

## fujaairah

## hatta

## saline water crops

pearl millet, salicornia and quinoa are crops identified by the icba (the international center for biosaline agriculture) research center in dubai as nutrient dense plants that can tolerate high heat, salty waters, and poor soil. although currently sourced from outside the region, we use these products throughout our menu as a salute to the non-profit center's work that aims to improve agricultural productivity and sustainability in marginal environments.

## abu dhabi

## below farm

specialty mushrooms grown on upcycled local palm leaves

## sweihan

## mary anne's edible flowers

just off the stretch between dubai and al ain is a small indoor farm run by mary anne. she produces the edible flowers and microgreens used in our menus and delivers them to us personally only hours after they have been harvested. these nutrient dense plants are grown in indoor aquaponics which means that they are pesticide-free, and that water usage is reduced by 90% compared to traditional farming methods.

## homaid

found in both rocky and sandy terrains across the country, it translates loosely to 'sour-y'. the leaves are triangular to oval and the flowers bloom green with a red tinge. they have a slightly sour and bitter taste. we use homaid leaves fresh and in a puree form.

## emirates bio farm

the uae's largest organic farm. boca aspires to align its sourcing to organic farm's seasonality and harvests.

## al ain

## pure harvest farm tomatoes

boca signed an exclusivity deal with local vegetable producer pure harvest smart farms, consolidating all tomato purchases with them. scan the code to see our tomatoes' journey from the farm in al ain to our table in dubai.

## THE LEGEND

-  Responsible farming, protecting communities.
-  Preserves pollinators and nature's balance.
-  Grown without chemicals.
-  No animal-based fining agents.
-  Farming that respects all life.
-  Wines we love for their taste and story.
-  Hidden gems at great prices.
-  Wine by the glass, without waste.

## SUSTAINABILITY AT HEART

We believe exceptional dining should go hand in hand with sustainable practices. Our wine list reflects this commitment, featuring a carefully curated selection of producers from around the world who prioritize responsible farming, community engagement, and environmental stewardship.

## REGIONAL PRODUCERS

Despite the unique challenges of the Middle East, we proudly represent nearby countries producing exceptional wines. Keep an eye out for wines from Palestine, Syria, Lebanon, Turkey, and India.

# FRANCK MASSARD - PRIORAT, SPAIN

What's more, the dead wood is a direct food source for many beings and organisms such as fungi and insects. In turn, these insects are food for birds, mammals, reptiles... This contributes to the increase of fauna, creating a healthy and sustainable environment."

Franck Massard, Winemaker

# ALHEIT VINEYARDS - WESTERN CAPE, SOUTH AFRICA

A man with a beard, wearing a dark quilted jacket and light-colored pants, is kneeling in a vineyard. He is focused on pruning a vine, using red-handled shears to cut a branch. The background shows rows of grapevines under a soft, golden light, suggesting late afternoon or early morning. The ground is covered with dry straw or mulch.

“We believe that quality and beauty in wine come from the vineyard alone. The true wonder of wine is revealed when all the nonsense and lies are stripped away. Therefore, we practice simple and careful winemaking: no yeasts, no enzymes, no acidification, no sulphur before ferment, no blocking malo, no new barrels, no fining etc. No manipulation. This is the core principle we adhere to. We cannot in good conscience talk about the importance of place if we’re manipulating the wine. We’re hoping to find the voice of the land, not the mark of the winemaker.”

- Alhiet Family

BOCA is thrilled to partner with Journey's End, united by our shared values with sustainability at the core of our mission. Both BOCA and Journey's End prioritize renewable energy, responsible farming, and uplifting local communities, striving to be a force for good.

Founded in 1995 by the Gabb family, Journey's End is dedicated to sustainably and ethically producing premium wines for every occasion. A key example of their commitment is the 'wonder plants' in pots at your table, which have contributed to the vineyard becoming carbon negative. Journey's End was recognized in The Drinks Business Green Awards 2021, winning both the Ethical Company and Water Management awards.

### **ABOUT THE MENU COVER**

The menu folder is crafted from upcycled leather and recycled broken rails from Journey's End, part of a broader empowerment project in South Africa. The skins are sourced from local farms in the Western Cape, sent to one of the few tanneries in the country for careful treatment. Each hide is graded and curated into a variety of products, supporting small industries in South Africa and strengthening local economies.

For more information on Journey's End's sustainable initiatives and the Spek boom miracle plants, please scan the QR codes in front of you.
