Camp Explorations provides children with fun-filled weeks. The main themes include Fitness, S.T.E.A.M., and Literacy and all activities are designed to meet children’s interests. We have an energetic staff that engages the children with games, arts and crafts, team sports, special guests and weekly field trips. We also have a weekly talent show that allows children to work together as a team and use their creative and imaginative skills.

SESSION	DATES	THEME	ACTIVITY/FIELDTRIP/Special Guest

Session 10	August 9-13	Wonders of the Deep Sea	Marine Science Institute
Session 11	August 16-20	Showtime: Act It Out	Music Play Patrol – Campfire Stories

Field trips are subject to change

Program Descriptions

June 7-11: Art of Design

Imagination and inspiration will shine this week as campers explore the art around them! Campers will be introduced to a variety of art forms, techniques, and artists. Art explorations will include calligraphy, architecture, and landscaping to name a few. A local artist will also host a guided paint class.

Activity/Field Trip: Hosted Paint Class

June 14-17: Game On

It's "Game On" as summer explorers delve into the world of professional sports. Have you ever wondered why golf balls have dimples? Join us to find out! Campers will discover how science plays a role in the most daring athletic feats, how sports equipment supports players, and what can be accomplished with hard work and persistence.

Activity/Field Trip: Lionheart Fitness Kids

June 21-25: Living Green

So much happens with our foods before they ever reach the supermarket shelves. During Living Green week, campers will be learning everything from wind farms to the variety of agricultures that supply us with food each day – from apple orchards to worm farms.

Activity/Field Trip: Composting Education Program & Build Your Own Terrarium

June 28-July 2: Full STEM Ahead

The exciting world of science, technology, engineering, and math (STEM) is happening all around us. We're going Full STEM Ahead as we discover how even the simplest machines can create the most fun. Campers will blend art and engineering as they uncover what role science plays in their favorite toys and have a chance to design and create new inventions of their own.

Activity/Field trip: Mad Science

July 5-9 (Closed 7/5): Builder's Academy

We will get out the hardhats and toolbelts as campers dive into the world of carpentry and woodworking. This week, children will learn how to safely use basic carpentry tools and explore different wooden materials. Campers will measure, cut, glue, and hammer their designs into wooden works of art!

Activity/Field trip: Home Depot Construction Models

July 12-16: Be A Young Zoologist

Spend a week exploring the unique world of animals! Campers will investigate and get answers to questions like, "why do tigers have stripes and cheetahs have spots?" or "why do some penguins live in the Arctic and others live in the tropics?" Join us as we un-solve these animal mysteries!

Activity/Field Trip: Tiny Tails to You Animal Show

July 19-23: Taste Detective

Channel your inner chef and join us for an adventure for your tastebuds! Campers will design their own apron and chef's hat to make sure they look the part. Then, our young chefs will be ready to cook up a storm and create tasty dishes of their own.

Activity/Field Trip: Chef-led Cooking Classes

July 26-30: Excavation Exploration

Calling all aspiring paleontologists and ground explorers! This week will be dedicated to learning about the history of the Earth through fossils and rocks. Campers will create, dig up, and examine fossils to piece together where and how ancient creatures roamed the Earth. Children will also learn how to use a metal detector to uncover hidden gems.

Activity/Field Trip: Geodes Treasure Hunting

August 2-6: The Creative Arts

From watercolors, clay, to paper mâché, children will discover how to use different art materials to create classical and modern art. Artists will need to roll up their sleeves as they get elbow-deep in ooey-goey materials to explore. Campers will use all their senses to create unique masterpieces for the art show, to end the week!

Activity/Field Trip: Drawing Experience with Local Artist

August 9-13: Wonders of the Deep Sea

Did you know our oceans cover more than 70% of the Earth's surface, yet only 5-10% of the deep sea has been explored? Campers will focus on uncovering the great mysteries of the oceans by going on virtual voyages, studying water creatures and finding sunken treasures.

Activity/Field Trip: Marine Science Institute

August 16-20: Showtime – Act It Out

Three, two, one...ACTION! It's Showtime as campers "act it out" using a variety of performing arts techniques. Through mime games and drama exercises, explorers will practice conveying emotions and stories through facial expressions, body language, props, and voice. They will also discover other ways to put on a show as they learn the ins and outs of stop-motion animation.

Activity/Field Trip: Music Play Patrol – Campfire Stories

2021 LifeConnections Children's Learning Center Summer Camp Registration Form

Camper Name: _____ First Time Attending Camp? _____

Address: _____

Date of Birth: _____ Male/Female: _____ T-Shirt Size: _____

Are there any allergies or food restrictions we should be aware of? _____
