

Nut Safe Environment

Children and adults at our center have been diagnosed with nut allergies. Such an allergy can produce a severe reaction if they are exposed to any type of nut products. We would like to do everything we can to make Bright Horizons at Skokie as safe as possible. Therefore, we have declared Bright Horizons at Skokie a *nut safe zone*.

We will do everything in our ability to keep nut products out of the center. We will not order any foods that contain or are prepared with any nut products, nor will we knowingly serve any such products to a child or adult who has a known allergy.

We are asking that all families do everything possible to ensure that any foods brought in for birthdays or special events (including items that are for the staff or adults) do not contain any nut related products. Please make sure that you read all labels before purchasing items to bring into the center.

Lastly, many cakes made in specialty or bakery shops contain nut residue from products made throughout the day – we encourage store brought products with ingredients carefully labeled.

Thank you for your cooperation.

Linda Steele – Director

Jill Infante – Assistant Director
