

My name is Charlotte Valdez and I am excited to be supporting your center as a field director. I have my Bachelor's degree in Child and Family Studies from the University of Southern Mississippi. During my last semester of college, I moved to St. Louis to do an internship at Children's Hospital in their child life program. While in St. Louis, I started my journey with Bright Horizons in 1999. In 2011, I moved back to Denver to be closer to my brother and extended family.

During my time with the company, I have been an education coordinator, assistant director, director and for the past 11 years, a field director. I enjoy forming strong partnerships with families and learning from the children and staff. I enjoy seeing the excitement the children have about learning and supporting the growth of teachers.

In my spare time, I enjoy reading, spending time with my family, my dog and traveling.

I look forward to working with everyone and supporting the center during this time. Please feel free to stop by the office to share your feedback, questions, and concerns or just to talk.
