AIR PIX
AERIAL CAMERA

YOUR POCKET-SIZED PERSONAL AERIAL PHOTOGRAPHER

AIR PIX boasts features and performance normally found on devices that cost more than twice as much. The autonomous flight functions of AIR PIX, either with or without a smartphone connection, allow users to **stay completely immersed in life activities while AIR PIX captures them in stunning HD photos or 1080p video**. This entry-level, Gen Z/Millennial aerial camera is fun and spontaneous and **puts the ability to take unique aerial selfies in the pocket of every teen, twenty-something and millennial!**

AIR PIX
Smaller than an
iPhone X

Weighs about the
same as a
golf ball

The AIR PIX is so light it **does not need any agency registration**. Its reinforced plastic airframe with chassis integrated propellers is the perfect selfie machine for safe indoor flying, hand landings and makes it **easy to slide AIR PIX into your pocket and take it with you wherever you go**.

THE EASY, INTUITIVE & POWERFUL APP

The new "One-Touch" AirSelfie app puts the power to pilot, shoot, edit and share stunning aerial images into anyone's hands.

IN-APP GALLERY & IMAGE EDITING

The AirSelfie app stores all of your images and video in an easy to manage Gallery where you can organize your memories into a favorites folder and customize them using the complete suite of image editing functions without ever leaving the app.

INSTANT SOCIAL MEDIA SHARING

Once you have your image just right you can instantly and seamlessly post it to your favorite social media platform right from the app!

THE EASIEST AERIAL CAMERA EVER!

The small size and light weight of AIR PIX make it the most convenient aerial camera in the world and **the industry's best app makes it easy to fly and shoot with or without a smartphone connection!**

ONE-TOUCH AUTO-FLY AUTONOMOUS FLIGHT

AirSelfie launches, flies out, finds you, takes multiple photos or continuous video and returns with the push of a button in the app.

APP-FREE AUTO-FLY AUTONOMOUS FLIGHT

Launch, fly, shoot selfies and land completely autonomously without a connection to a smartphone.

APP-CONTROLLED MANUAL FLIGHT

Use the easy piloting controls in the app and the gyroscope in your smartphone to fly and shoot.

GESTURE-CONTROL MODE

Fly and take photos and video by using simple gestures without a connection to a smartphone.

Plus, more flight modes coming in future app updates!
