

Toronto | Canada | Tuesday 26 April 2022

Venue: The Omni King Edward Hotel, 37 King Street East, Toronto, On M5C 1E9, Canada.

THE BENCHMARK WORLD TOUR IS THE ORIGINAL AND WORLD'S LEADING SERIES OF INVESTMENT SEMINARS FOR THE LITHIUM ION BATTERY TO ELECTRIC VEHICLE (EV) SUPPLY CHAIN.

Starting in 2015 and anchored by Benchmark Minerals' expert analysts and original data, The Benchmark World Tour pioneered the global discussion of what has become one of the most significant mega trends of the 21st Century, the Energy Storage Revolution.

After five world tours and 19 host cities across five continents, The Benchmark World Tour returns for 2022 to focus on the unprecedented growth the lithium ion industry is experiencing. Benchmark will lead the discussion on how downstream demand coupled with the current raw material disconnect is having huge impact on the lithium ion battery to electric vehicle supply chain
