Layout/Background Design

I mostly focus on layout and background design. I love the process of coming up with unique compositions and creating different affects with light and color. I am also passionate about illustration and more specifically childrens books. I enjoy making fun characters and interesting stories.

Graphic Design for Entertainment Arts Fall 2021 Paul Rogers

In this course I created two layouts of "The Ugly Mug Cafe". For these layouts I created a day and night scene with a graphic style with texture. I also completed a layout of the "Home Motel". For this piece, I did a 2d layout with flat colors. I focused on making a sad lonely motel after the rain.

Childrens Book Illustration Spring 2022 Stephen Turk

During this course I got the opportunity to focus on various layouts and backgrounds. I used this class to dive into reasearch and go to different places to create accurate and interesting layouts. I also explored different perspectives and spent a lot of time developing my compositions.

Entertainment Arts Project Studio Fall Fall 2022 William Perkins

During this course I worked on two childrens books. The first book I worked on was about a little girl named Carmela, and her adventure in Mexico with Mexican candy. I tried to incorporate my background and experiences to create a unique story that people could enjoy.

My second book I worked on is called "Misplaced". This story is about a puzzle piece named "Duncan", and his journey of discovering what truly makes a home.

Skills

Layout Design
Background Painting
Illustration
Applications:
Photoshop
Illustrator
