

# NO LEAD

High Performance Aluminium Flashing

The Alternative  
Cost saving  
Solution To Lead

**NO LEAD** is a high performance low cost aluminium flashing suitable for use as an alternative to traditional lead in both flat and pitched roof applications.

**NO LEAD** is produced from sheet aluminium with a protective polyurethane coating on top and a polyisobutylene adhesive on the underside. Finished with a dimpled profile this unique construction ensures that **NO LEAD** is waterproof, durable and extremely malleable. The polyisobutylene adhesive ensures a strong permanent bond to all building materials without the need for a primer unless a surface is extremely unstable and forming a watertight joint requires no additional tape or sealant.

**NO LEAD** is extremely safe to use due to its light-weight construction and cutting and shaping is achieved with a knife or scissors that produce no sharp edges. Consequently installation is rapid and safe with no health and safety issues.

**NO LEAD** has a 15 year guarantee with a life expectancy in excess of 20 years.

 **LOW COST**

 **LIGHTWEIGHT**

 **DURABLE**

 **WATERPROOF**

 **HIGH PERFORMANCE**

 **EASY APPLICATION**

 **ALTERNATIVE TO LEAD**

 **LONG LIFE EXPECTANCY**
