Ms. Becky & Ms. Kat

The Academy
Venice

Summertime is in full swing and we hope you are enjoying the hot weather! Last month we tasted many fun summer treats and learned about the beach and the ocean. This month we will focus on our incredible imaginations!

The first week of August will focus on the circus and carnival. We will be making lions masks and puffy paint cotton candy, and enjoy yummy shaved ice and popcorn while reading and watching about the roles each circus crew member has—all while wearing our pajamas!

The second week will be spent learning about the Wild West. We will be making cowboy hats and boots, wanted posters, counting cacti flowers, singing fun cowboy and cowgirl songs and learning a bit of line dancing!

The following week, we will concentrate on dinosaurs! Together we will learn all about the various types of dinosaurs and why they became extinct. We will make triceratops masks, use colored triangles to decorate a stegosaurus, break dinosaurs free out of their frozen eggs, make a sparkly brachiosaurus, and make clay fossils!

During the last week we will learn all about robots and various inventions! The kids will build a paper rotary phone, learn how to dial a number on a landline, decorate R2D2 with different shapes, and play the "Telephone Game!"

Reminders
