Spring

### Star of the Week:

3/4-3/8: Hannah A

3/11-3/15: Sora T

3/25-3/29:  
Selena

Happy Birthday to Lia !  
March 20th Lia turns 4!

During our first week we are going to MARCH into **Spring**. Be careful to not step on any little critters as we march. Ha! The beginning of spring week is all about bugs and our kiddos will use their fine motor skills to pitch and squeeze a clip onto the correct number when counting lady bugs on clip cards. We will also talk about how important bees are for helping plants grow. Without pollen and bees how can we have flower power? That's right we will learn about flowers and decorate our own flower to complete a class flower pot. We will end the week with celebrating St. Patrick's day as we create shamrock sun catchers and complete a literacy pot of gold map.

Throughout our second week of March, our teachers will sprinkle or flood our classroom with knowledge about **weather**! Where does rain come from? Why do we have clouds and storms? Science is awesome! We are going to make our own rain cloud in the classroom, along with a snow storm and tornado storm in a jar. We will end the week playing a 'I Spy' weather game.

During our third week of March we will be on **Spring Break**! Soak up some sun at the park or jump in a puddle with your child. Have fun and be safe!

The last week of March we will put on our overalls and head over to the farm as we will learn all about a **farm**. Our class is going to spin the wheel of farm animals and write down the first letter of the animal. We are going to learn about tractors, sheep, cows, and horses!
