

Hi, my name is Dung Ho. Growing up in Vietnam, my father taught me the magic of breathing new life into old objects, sparking my curiosity about how things were made. Curiosity is what drives my work as a Product Designer. Understanding how things work and who they are made for, allows me to reimagine and reinvent.

From innovation to quick solutions, I immerse myself in the cycle of research, ideation, prototyping, testing and making, creating products that are straightforward, beautiful and functional. At the heart of design lives my desire to find the magic, creating products and experiences that are accessible and kind to the world we live in.

Education	ArtCenter College of Design	El Camino College
	2018 - 2022	2016 - 2018
	Bachelor of Science in Product Design	Design, General Education
