VALUES

We focus in detail on the quality of work, innovative approach, trust and reliability in the relationship with investors and our own employees.

Throughout our business, we constantly expand our diversity business activities and areas.

RESPONSIBILITY

We focus on environmentally and socially responsible approach to our surroundings. We apply trends focused on sustainable and renewable resources. We maximise the use of recycled building materials in our activities, materials and implement measures to reduce water and energy consumption.

We carry out projects with BREEAM and LEED certification and in cooperation with CREE Buildings, we have expanded into the hybrid building segment.

CONTINUITY

We build on the expertise, skills and commitment of our employees. We constantly monitor new trends and thus streamline our own expertise and performance.

Our customers and partners thus benefit from more than three decades of experience and the ever-expanding potential of the company and its people.

PROFESSIONALISM

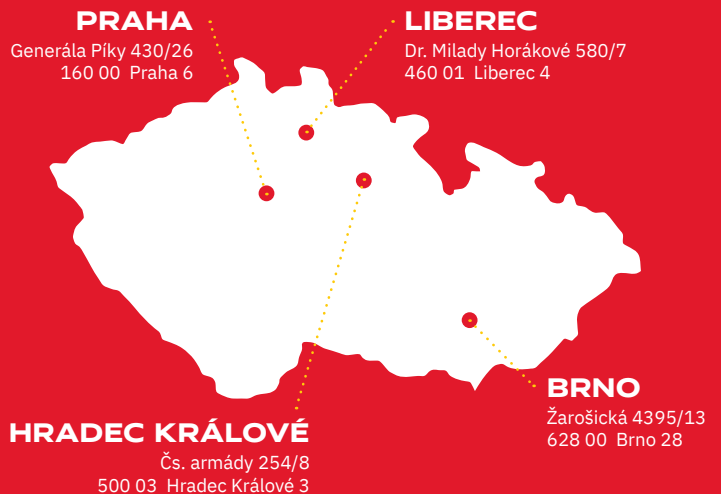

Thanks to the know-how of our people we can realize many unique constructions of various focuses - from environmental damage remediation to high-tech office buildings, modern and user-friendly apartment complexes, to huge multifunctional complexes, logistics halls or entire industrial zones.

Our extensive portfolio of projects provides countless qualified and highly specialised technical and working professions.
