Width	336mm
Pack Quantity	21
Packs Per Pallet	42

Technical Data (Hexagonal)

Weight	28.5kg
UV Protection	Yes
Coverage	3m ²
Length	1000mm
Width	318mm
Pack Quantity	22
Packs Per Pallet	45

Rose Roofing bitumen roof shingles are felt shingles for roofing which are made from bitumen and are similar in nature and use to shed felt but are highly superior.

Roofing felt shingles need to be fixed onto an apex timber roof. The next row of roof shingles is applied above that but slightly offset so the correct pattern is formed. You can install shingles with shed felt roof tacks/nails.

Shingles are perfect for a number of applications including shed roofing, roofing garden buildings, house roofs and Industrial buildings. Most of the people who buy shingles from us are using them for DIY roofing projects on sheds, log cabins, summerhouses and garages.
