BFA in Illustration Entertainment Arts

INTRODUCTION:

I am a California-based Character and Concept Designer and Illustrator. I love designing interesting and unique characters and the various gadgets and gizmos that they use. I am tenacious and determined to achieve the goals I set for myself. I am thorough with my work and am quick to adapt to unfamiliar situations.

SKILLS:

• **CHARACTER DESIGN:** I am an effective communicator. I am an effective researcher, and I use both quick communication and reliable foundational research to create interesting and interactive character designs.

• **CHARACTER AND PROP RENDERING:** I have an adept understanding of space, value, and form. I quickly and reliably transcribe potential ideas from myself and colleagues into easily readable and intriguing forms using both traditional and digital media.

• **PAINTER:** I am an effective traditional and digital painter. My knowledge of light and shadow in relation to form combines with my concept design abilities to produce designs that are vibrant and rich in both content and aesthetic.

• **TRILINGUAL:** I am fluent in English and Korean, and am conversationally fluent in Spanish

COMMISSIONS:
Background Painting - 2020
Original Character Illustrations - 2020
