Role of Genetics & Epigenetics in Familial MS Study

Are There Any Genetic & Epigenetic Factors That Influence MS?

Abu Dhabi Stem Cell Center, Yas Clinic and Khalifa University are working on answering this question. The collaborative study aims to identify any genetic and epigenetic factors within the UAE population that might influence the risk of MS, its severity and progression. The research aims to further improve treatments and early detection of MS.

WHO CAN PARTICIPATE?

- Aged 18 and above
- UAE National living with MS
- 1st Degree relative of a person living with MS (Parent, Sibling, Child) with no medical condition
- Can attend sessions at Yas Clinics, Abu Dhabi
- Final eligibility for participation is subject to a clinical evaluation

- Dr. Halima Al Naqbi, Principal Investigator
