

Nandan

Hi, I am Venkata SivaNandan Pemmaraju, a multidisciplinary designer who can design and creative direct Spaces, Graphics, and Objects of desire. Partnering up with two, I led a design studio working from concept development to the construction and making of multiple boutique architectural spaces(Architectural Design, Interior Design, graphic design, furniture design, and decoration). I am currently a graduate student at ArtCenter College of Design, Pasadena, California exploring and expanding my world of making. I recently had the amazing opportunity to work on a sponsored project with the Electric mobility giant NIO which opened me up to amazing new dimensions in design.

Looking to dive deeper into this sea of a field, I am currently seeking a designer role.

INDUSTRY EXPERIENCE-

SPATIAL DESIGNER-STUDENT- 2021

NIO

As a spatial designer, I created an opportunity in the project to realize a lesser-known precedent solution. Teaming up with product and interaction designers I had the opportunity to craft this wholesome project which fits the brief custom-made. After rigorously brand strategising we designed a solution that would appreciate and enhance nomadic experiences through mobility marking the rising numbers of the nomads of the world - the "NIOmadic" future we as a team named it.
