

Cal Club SCCA Supplemental Safety Guidelines COVID-19

The purpose of this document is to layout the modified guidelines for event safety in wake of the COVID-19 pandemic. These guidelines are intended to create a safe event environment by following the recommendations set forth by both the National SCCA office and all Government mandates.

We ask that all participants review this document. Your understanding of these guidelines will help keep our events possible. Please keep in mind the following:

1. Some of our members are in high-risk categories. Others may have at-risk family members at home. Do your best to keep them safe.
2. Respect your fellow members. Your opinions about current guidelines are not shared by everyone. Behave accordingly, and keep it about the racing, that's why we're here.
3. The virus is not the only risk to our events. Government officials have the power to end current and future events, including potential monitoring by law enforcement and the health department. Our venues can also shut down our events if they perceive that we are not behaving appropriately. So, behave as if your day of racing, and everyone else's, depends on it – because it does. Non-compliance with these safety guidelines may result in your removal from the event.

The following guidelines and revised event protocols, in conjunction with those issued by the SCCA National Office, are our attempt to secure your safety given what we know at this time. We cannot predict every circumstance or mitigate every potential risk. We are counting on you to exercise your best judgment both before and throughout the event. We reserve the right to change these processes, at any time, as may be needed.

If you are sick or symptomatic, stay home. Self-check your temperature before the event and if it is over 100.3 °F please stay home. You will not be charged if you do not attend. Additionally, upon entry to the site your temperature will be taken using a no-touch thermometer. Entrance may be denied pending this reading.

If you become sick at the event, let us know! Please maintain your social distancing and notify the event chair immediately. We are contractually obligated to inform Autoclub Speedway of any potential event exposures to COVID-19. Please practice social distancing and contact the event chair prior to leaving so that we can get you help if needed, and track others who may have been in contact with you.

Events are closed to spectators. This includes your family members and friends that may want to come down and watch or support. Only registered entrants are allowed into the event.

Participants are required to bring their own personal protective equipment (PPE). Your safety needs to be your first priority as always, please do not show up to an event without a proper face covering. We will have hand sanitizing materials, as well as gloves and basic PPE on hand for event operational needs only. We reserve the right to turn anyone away who does not come prepared to our events.

You must observe all social distancing, sanitizing and handwashing guidelines. You must maintain social distancing and have your face covering with you at all times during the event. If social distancing is not possible at any point in time while at the event, you must wear a face covering. Course walkers must wear a face covering and to the extent where practical, maintain social distance.

Again, participants must wear face coverings at all times when in hot areas of the event (grid and course), during your work assignment and during your run group when not helmeted in your vehicle.

The loaner helmet program is suspended until further notice. Loaner helmets will not be available, you must bring your own.

Co-driving of vehicles shall be limited to the following persons:

- Direct household members
- Registered and consenting co-drivers

Instructor ride-alongs will no longer be allowed until further notice.

The following are additional revisions to event protocols and processes that will be implemented. These changes are being made to limit social interaction and shared touch points. They may be modified as needed throughout the event season:

- Registration, waivers and wristbands, and tech will be handled on a drive through basis, observed at a social distance. Unnecessary handling of waivers, wristbands and tech inspection documents should be avoided.
- Paddock spaces shall observe social distancing protocols. Ample paddock space will be provided such that no two cars shall be parked adjacent to one another.
- Tech shall be performed by the driver who shall be supervised by a Cal Club member. If assistance is required, a Tech worker may perform the duty as long as social distancing is respected.
- The drivers meeting will be conducted via FM radio broadcast, and via our public address system. Do not gather as a group at the trailer, maintain social distance.
- The Timing Trailer will be limited to critical personnel only. Access is denied to anyone who is not listed for work in the trailer.
- Event equipment and work surfaces must be sanitized throughout the day. Before and after your work assignment, use the materials provided to wipe down radios, headsets, flags, keyboards, work surfaces, etc. and use gloves during your assignment if possible

If necessary, remind each other gently and respectfully to observe these guidelines. **Anyone who continually or willfully violates these guidelines will be asked to leave.** Thank you in advance for your cooperation, and we look forward to seeing all our friends back in action!

Linked below is the SCCA Home Office's official COVID-19 recommendations page. Please review the link for further tips on how to help us keep our events safe in these trying times.

From all of us at Cal Club Autocross, thank you for your support. Let's keep six feet apart so we don't have to hold the start!
