

BUILDING ALASKA'S NEXT GOLD MINES Corporate Presentation

March 2024

CONTINGO ORE

GOLD SILVER COPPER

NYSE-A: CTGO

FORWARD LOOKING STATEMENT

The Feasibility Study ("FS") referenced herein that relates to Peak Gold, LLC ("Peak Gold"), was prepared by Kinross Gold Corporation ("Kinross"), which controls the Manager of Peak Gold and holds 70% of its outstanding membership interests, in accordance with Canadian National Instrument 43-101 (NI 43-101). Contango Ore, Inc. ("CORE" or "Contango") owns the remaining 30% membership interest in Peak Gold, and must rely on Kinross and its affiliates for the FS and related information. Further, CORE is not subject to regulation by Canadian regulatory authorities and no Canadian regulatory authority has reviewed the FS or passed upon its accuracy or compliance with NI 43-101. The terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" as used in the resource estimate, the FS and this presentation are Canadian mining terms as defined in accordance with NI 43-101. In the United States, mining disclosure is reported under sub-part 1300 of Regulation S-K ("S-K 1300"). Under S-K 1300, the U.S. Securities and Exchange Commission ("SEC") recognizes estimates of "Measured Mineral Resources", "Indicated Mineral Resources" and "Inferred Mineral Resources". In addition, the definitions of "Proven Mineral Reserves" and "Probable Mineral Reserves" are substantially similar to international standards. Under S-K 1300, an SEC registrant with material mining operations must disclose specified information in its SEC filings concerning mineral resources, in addition to mineral reserves, which have been determined on one or more of its properties. Such mineral resources and summarizes the information reviewed and conclusions reached by each qualified person about the SEC registrant's mineral resources or mineral resource estimates of the Mana Resources or mineral resource estimates and mineral resource at a conclusions reached by each qualified person about the SEC registrant's mineral resources or mineral resource estimates and mineral reserves estimates for the Manh Choh p

Investors are cautioned that while the S-K 1300 definitions are "substantially similar" to the NI 43-101 definitions, there are differences between the two. Accordingly, there is no assurance any mineral reserve or mineral resource estimates that Peak Gold may report as "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had CORE prepared the mineral reserve or mineral resource estimates under S-K 1300. Further, U.S. investors are also cautioned that while the SEC recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under S-K 1300, investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. Mineralization that has been characterized as resources has a greater degree of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, investors are cautioned not to assume that any measured mineral resources, indicated mineral resources or inferred mineral resources that CORE reports are or will be economically or legally minerable.

For more detail regarding the FS, please see CORE's press release dated May 26, 2023: https://www.contangoore.com/press-release/contango-oreannounces-completion-of-s-k-1300-technical-report-summary-for-its-manh-choh-project-in-alaska. Investment Highlights

- ✓ Alaska considered one of the top 10 jurisdictions in the world for mining investments¹
- ✓ Manh Choh Mine One of the world's highest grade open pit gold mines (8 g/t expected average grade)
- ✓ We believe the following factors significantly de-risk the Manh Choh project:
 - ✓ Agreement in place with Tetlin Alaska Native Tribe
 - ✓ Fully Permitted All State and Federal permits received
 - ✓ Proven operator for Project Kinross
 - ✓ Turn-key operation major contracts in place
 - ✓ Project financing arrangements in place ING/Macquarie Banks - US\$70 M Line of Credit
 - ✓ Fully funded to production
 - Currently mining and stockpiling ore at the Manh Choh mine site and transporting to the Fort Knox Mill stockpile
 - ✓ Production expected H2 2024
- ✓ Strong cash flow per share (CFPS) expected to start in 2024
- ✓ Exploration upside

Developing Alaska's Next Gold Mines

Manh Choh Mine – Mining and Stockpiling Ore Underway

- Partnership with Kinross (70%) and Contango (30%)
- Using existing Fort Knox milling facilities owned by Kinross
- Reduced execution risk

Partnership with the Alaska Native Tetlin Tribe (Royalty)

Lucky Shot Mine – Initial Resource

• 100% owned

ALASKA

- Exploring historic high-grade gold mine
- Permitted for mining
- 106,000 Oz Indicated Resource grading 14.5 g/t Au

Reserves/Resources

Manh Choh Gold Project: Anticipated Economics

Model Assumptions per Contango Manh Choh SK 1300 Report¹

• Using existing infrastructure at Fort Knox, Peak Gold is planning on a H2 2024 start date

- Average processed grades expected to be ~8 g/t Au
- Capital Costs

➔ Initial \$189 million (including \$14M Contingency) for Peak Gold – Contango's Share: \$56.8 million

- → \$26 million Capitalized Strip Contango: \$7.8 million
- → Total Capital Costs to Contango = \$64.6 million based on the Manh Choh SK 1300 Report¹

• Operating Costs - Contango AISC = \$1,116/GEO¹

¹ See Contango's SK1300 Manh Choh Technical Report Press Release dated May 26, 2023; Initial capex reflects the Kinross feasibility study reported in "Q2 Corporate Update" Press Release and Corporate Presentation dated July 26 and 27, 2022; The optimization for the mineral reserve estimate assumed a \$1,300 per ounce gold price; the \$189 million estimate reflects remaining funds to be expended between 2022 and 2024; there will be additional capital required at Fort Knox to accommodate Manh Choh ore; and is a Toll Milling charge to the Peak Gold JV; "All-in sustaining cost (AISC) per equivalent ounce sold" is a non-GAAP ratio. "GEO" refers to Gold Equivalent Ounces. See: <u>https://www.contangoore.com/press-release/contango-ore-announces-completion-of-s-k-1300-technical-report-summary-for-its-manh-choh-project-in-Alaska</u>. The information contained in, or otherwise accessible through, the links are not part of, and are not incorporated by reference into this investor presentation.

Manh Choh Illustrative Economics

Illustrative Economics at Select Gold Prices¹

Gold Price (\$USD)	\$1,520	\$1,620	\$1,720	\$1,820	\$1,920
GEO Per Annum (000's)	225.0	225.0	225.0	225.0	225.0
Contango JV Ownership	30%	30%	30%	30%	30%
Contango GEO Per Annum (000's)	67.5	67.5	67.5	67.5	67.5
Contango Revenue (\$USD) (000's)	\$102,600	\$109,350	\$116,100	\$122,850	\$129,600
Less: AISC (\$1,116/Ounce) (000's)	(75,330)	(75,330)	(75,330)	(75,330)	(75,330)
Contango Cash Flow (000's)	\$27,270	\$34,020	\$40,770	\$47,520	\$54,270

At gold spot price (\$1,920/Ounce) as of July 10, 2023

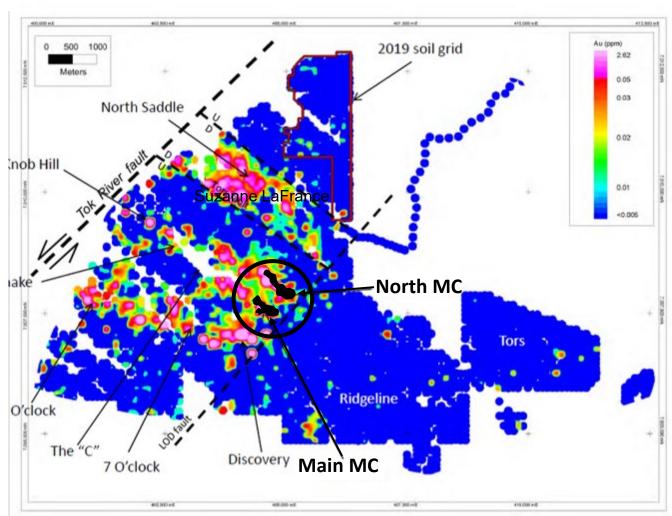

- \$129 M+ of annual revenue
- \$54 M+ of annual cash flow

Hedged 124,600 ounces of gold – Forward prices at \$2,025

¹ See Contango's SK1300 Manh Choh Technical Report Press Release dated May 26, 2023; Initial capex reflects the Kinross feasibility study reported in "Q2 Corporate Update" Press Release and Corporate Presentation dated July 26 and 27, 2022; The optimization for the mineral reserve estimate assumed a \$1,300 per ounce gold price; the \$189 million estimate reflects remaining funds to be expended between 2022 and 2024; there will be additional capital required at Fort Knox to accommodate Manh Choh ore; and is a Toll Milling charge to the Peak Gold JV; "All-in sustaining cost (AISC) per equivalent ounce sold" is a non-GAAP ratio. "GEO" refers to Gold Equivalent Ounces. Manh Choh Project and Surrounding Targets

Chief Danny Area: Gold in Soils (thru 2019)

\$4.7 Million Exploration Program Budgeted for 2024

- Continued exploration drilling for new resources in Chief Danny area
- Further evaluation of 685,000 acre Manh Choh project:
 - Follow-up regional stream sediment sampling anomalies
 - ➤ Trenching
 - Continued geologic mapping
 - Follow-up on detailed geophysical survey anomalies (gravity)

Early-Stage Exploration Projects (100% owned) ✓ Eagle-Hona

- ✓ Triple Z
- ✓ Shamrock
- → Current focus on Lucky Shot mine

¹Hart, C.J.R., 2005. Mid-Cretaceous Magmatic Evolution and Intrusionrelated Metallogeny of the Tintina Gold Province, Yukon and Alaska. Unpublished PhD thesis, University of Western Australia, 198 p.

Lucky Shot Vein: Overview

Lucky Shot Vein Historically mined +250,000 Ozs averaging 40 g/t gold

Contango:
→ 15.6 g/t Au = ½ Oz/ton Au¹
→ +1 mile (1.6 km) strike length and open along strike and down dip

1. See https://www.contangoore.com/press-release/contango-ore-issues-initial-s-k-1300-resource-technical-report-summary-for-the-luckyshot-project-alaska-indicated-grades-average-15-g-t

GOLD SILVER COPPER

Lucky Shot Vein: Oblique View – Looking West

Coleman Segment of Lucky Shot Vein

Inferred	82,058	9.5	25,110	

Coleman and Lucky Shot Resources Tables¹ Please see S-K 1300 Technical Report Summary on the Lucky Shot Project Alaska, USA

Link: https://www.contangoore.com/investors/overview

Note 1: Measured, Indicated and Inferred mineral resource classification are assigned according to CIM Definition Standards. Mineral resources, which are not mineral reserves, do not demonstrate economic viability and there is no guarantee that mineral resources will be converted to mineral reserves. This mineral resource estimate was prepared by Sims Resources LLC based on data and information available and has an effective date of May 26, 2023. The Measured, Indicated and Inferred mineral resources are reported using the following parameters: undiluted gold grades; long term gold price of \$US1,600 per ounce; reported as contained within a 3.0 g/t Gold underground shapes and applying a 3.0 meter minimum width at a 4.3 g/t gold cutoff grade ("COG").

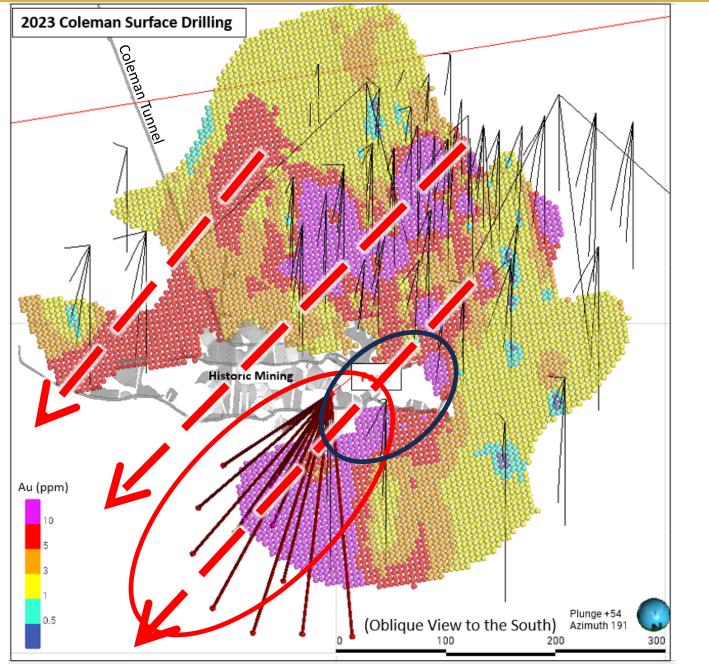

Coleman Segment of Lucky Shot Vein: Infill and Expand Resource

Large multi-drill hole pad established

Planned 3,000 m drill program extending mineralization down plunge

Coleman Segment of Lucky Shot Vein: Infill and Expand Resource

Currently:

Coleman Segment of Lucky Shot Vein

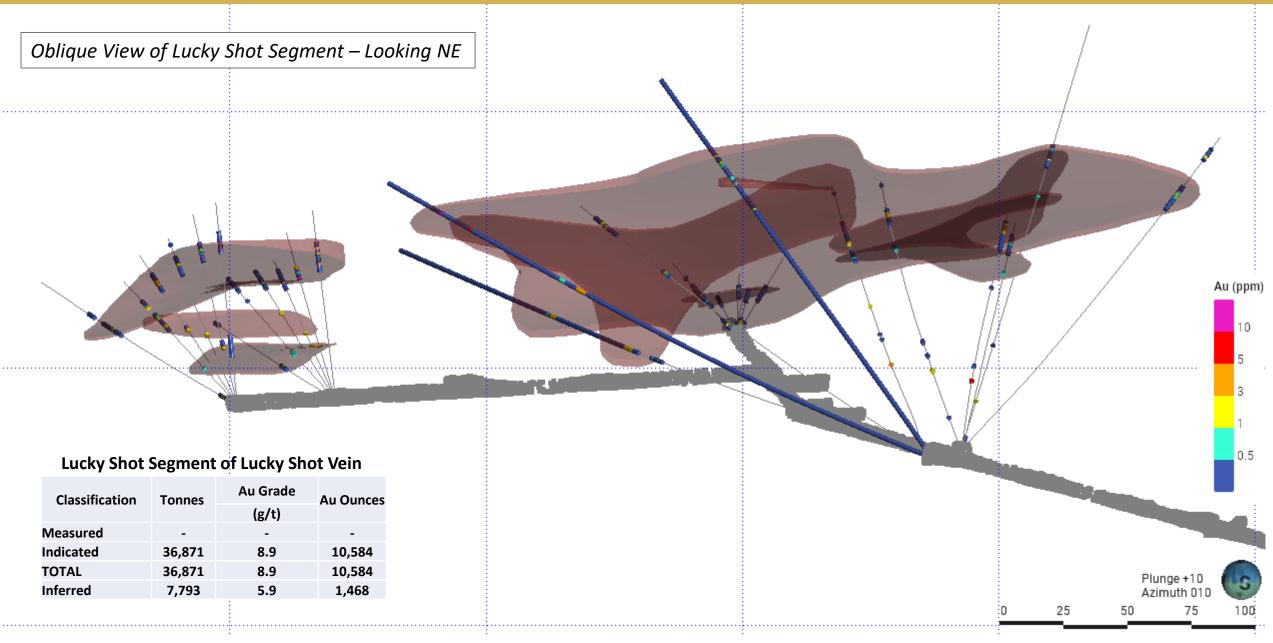

21

Classification	Tonnes	Au Grade (g/t)	Au Ounces
Measured	-	-	-
Indicated	190,092	15.6	95,036
TOTAL	190,092	15.6	95,036
Inferred	74,265	9.9	23,642

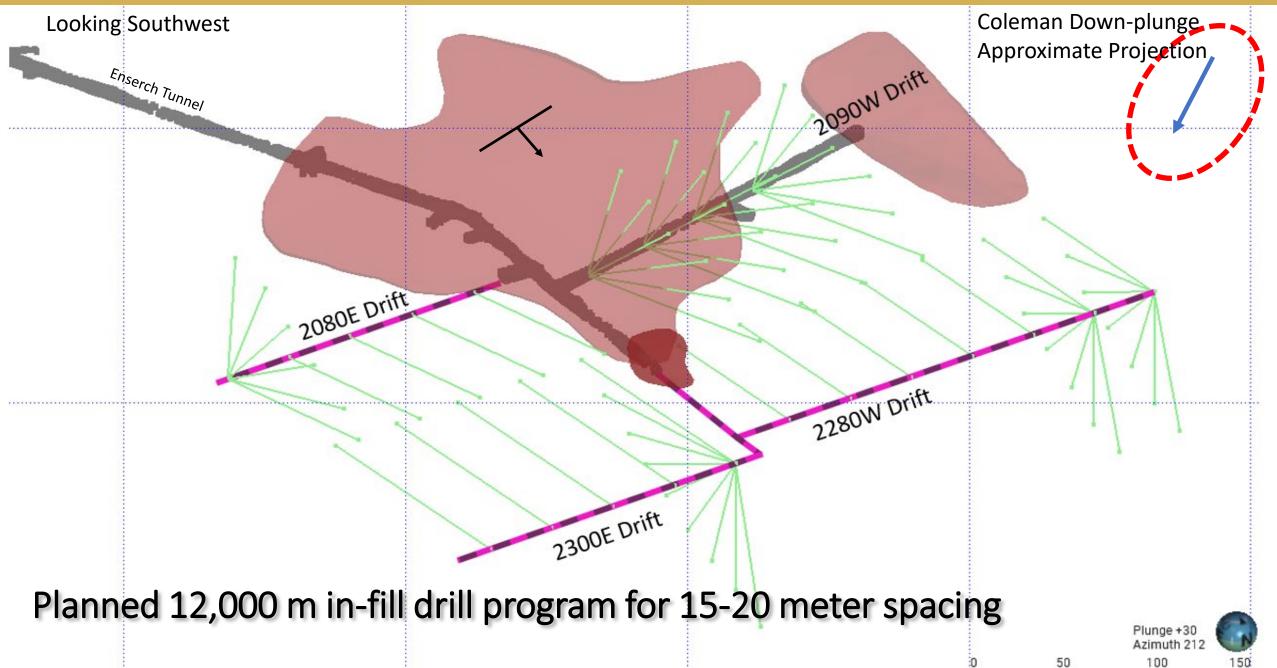

Objectives:

- 1) Upgrade 100,000 Oz Indicated Resource to Measured category
- 2) Increase M&I resource to 150,000-200,000 Oz
- 3) Evaluate mine optimization from Enserch Tunnel
- 4) Assess continued exploration opportunities

Lucky Shot Vein: Exploration Open Along Strike and Down Dip

Lucky Shot Vein: 300,000 to 400,000 oz Potential

Corporate Strategy

Use the cashflow from Manh Choh to grow the Company

→ Lucky Shot.....potential incremental growth in Contango gold production and cash flows...dependent on exploration success at Lucky Shot...Objective: grow annual gold production to +100,000 Oz

How to take Contango to the next level?

- Use our relative market strength to consolidate opportunities both in Alaska and elsewhere (US and Canada)
- Why does Contango have relative market strength?
 - ✓ High Grade
 - ✓ Near-term production-based cash flow
 - ✓ Solid operator in Kinross
 - ✓ Strong management team
 - ✓ US marketed story
- So how to take Contango to the next level?

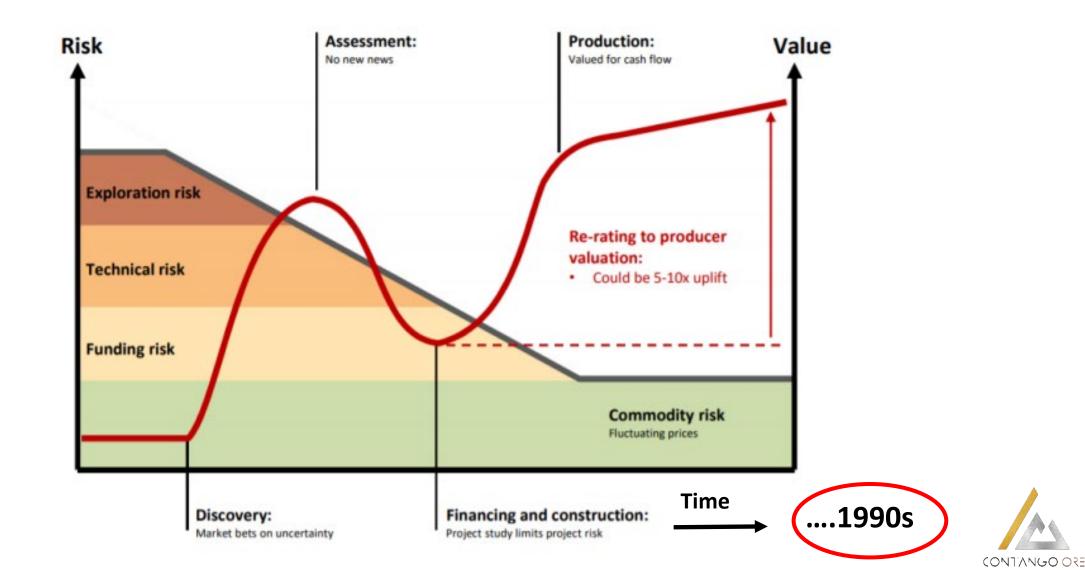

Fort Knox Mill

→ Take Advantage of the Lassonde Curve

The Lassonde Curve - The Challenge.....and the Opportunity

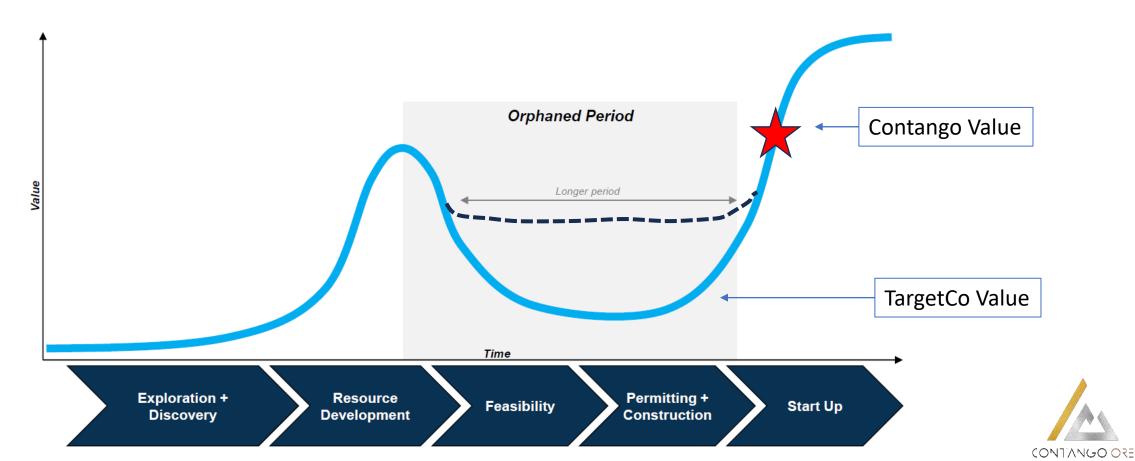

Corporate Strategy

The Lassonde Curve - The Problem...and the Opportunity

In most western jurisdictions the permitting process has become longer and caused significant "orphan period" for which poses a significant problem for many public markets' investors

- Orphaned companies can become uninvestable due to decline in market capitalization, lack of liquidity and limited catalysts
- Acquirers are increasingly focused on more advanced stage shovel ready projects that are fully de-risked, increasing length of period to M&A exit

THANK YOU

NON-GAAP RECONCILIATION DISCLAIMER

This presentation contains forward looking estimates of all-in sustaining cost ("AISC"), resources and EBITDA, which are financial measures not determined in accordance with United States generally accepted accounting principles ("GAAP"). We cannot provide a reconciliation of estimated AISC, resources and EBITDA to estimated costs of goods sold, assets and net income, which are the GAAP financial measures most directly comparable to such non-GAAP measures, without unreasonable efforts due to the inherent difficulty and impracticality of quantifying certain amounts that would be required to calculate projected AISC, resources and EBITDA. In addition, the estimates of AISC, resources and EBITDA have been prepared by Kinross and are based on IFRS accounting standards and detailed information that the Company does not have access to at this time. These amounts that would require unreasonable effort to quantify could be significant, such that the amount of projected GAAP cost of goods sold, assets and net income would vary substantially from the amount of projected AISC, resources and EBITDA.
