Kyrgyzstan

The Kyrgyz Republic – formal name of the country, situated at the heart of the Central Asia. Kyrgyzstan tourism became very popular recently. Our mountainous country bordered by Kazakhstan on the north, Uzbekistan on the west and southwest, Tajikistan on the southwest, China on the east. Kyrgyzstan is sometimes misspelled as

Kirgizistan, Kirghizia. Kyrgyzstan capital is Bishkek town, the largest city of the country. Kyrgyz derivate from Turkic work "kyrk" – forty, litteral translation – "we are forty". Manas epic told the story of joining 40 kyrgyz tribes by main hero Manas. Kyrgyzstan is popular by Kyrgyzstan mountains, Kyrgyzstan ranges – Celestial Mountains – The Tien-Shan. Kyrgyzstan tourism is developing very fast in last decade, that is due to the rich natural and cultural heritage, historical crossroad on the path of the Great Silk Road and Soviet Union period of the country. UNESCO/UNWTO Silk Road Heritage Corridor – Chang'an-Tien-Shan was passing by the territory of the Kyrgyz Republic. Kyrgyzstan accept visa free regime. Time in Kyrgyzstan moves very fast, different places, people, scenery, nature. Issyk-kul lake - great warm mountain lake in Kyrgyzstan. Lake Issyk-Kul is the second largest mountain lake after Lake Titicaca in South America. It is among the 25 largest lakes in the world and is in seventh place on the list of the deepest lakes on our planet. The length of this lake from west to east is 178 km, from south to north - 64 km, the maximum depth is 668 m. Issyk-Kul Lake also ranks second in water transparency after Lake Baikal.

The lake climate is very mild. In summer the average temperature is + 17 ° C. It would seem that at such a low summer temperature the winter should be very cold but actually the winter here is quite warm. In January the average temperature is -3 ° C. The

number of hours of sunshine is 2700 hours, which is even more than on the Black Sea. The local population calls Lake Issyk-Kul "The Pearl of Kyrgyzstan". Issyk-Kul in Kyrgyz means "Warm (hot) Lake". Why is it warm? - because apart from certain coastal areas Lake Issyk-Kul does not freeze in winter.

There are several versions of this phenomenon: some refer to the fact that there are thermal springs at the bottom of the lake that maintain its temperature above + 4 ° C; some believe that it is simply influenced by environmental factors, such as: mild winters, heat reserves in the vast water column, salinity of the lake, etc.

The Dungan Mosque was built in 1910-1912. This particular style of architecture was created by the best masters, headed by architect Zhou Si, who Haji Ibrahim specially invited from Beijing. The local people also took part in the construction of the mosque. This one-storey wooden building was made without a single nail. The corners of the roof were

decorated with dragon figurines; the walls with images of plants and mythological animals which, according to popular belief, bring abundance and ward off evil spirits, respectively.

The Mausoleum of Shah Fazil is a part of the Shah Fazil Historical and Architectural Complex. The complex is located in the Gulistan village of Ala Buka district. The mausoleum is the burial place of Mahmud ibn Nasir (nicknamed Shah Fazil, fair shah), who came from the Kara-Khanid dynasty that ruled in the 10th-12th centuries. The height of this pyramidal structure is 15.5 meters. The structure consists of a step drum and tall dome resting on it. The interior of the building is decorated with ganch-stucco carvings of bright colors.
