#### **Product Description**

Rose Roofing SBS 250 Polyester Underlay is a high performance SBS modified bitumen membrane.

#### Type of application

SBS 250 Polyester Underlay is intended for use as a 'pour-and-roll' underlay in a bitumen built-up roof system.

Membranes should be installed in accordance with the manufacturer's guidelines. A Guarantee of up to 20 years can be obtained by using a built up system in accordance with Rose Roofing's Guarantee Specifications.

## Compatibility

The material is compatible with all materials normally used in roofing structures and finishes and may be cut and formed using techniques described in BS8217: 2004. There are no harmful side effects associated with this material. Hydrocarbon solvent based products, such as naptha, paraffin and creosote will have a harmful effect and should not be allowed to come into contact with the material.

# Storage & Handling

Do not drag rolls across rough surfaces, always lift. Rolls should be stored upright on a dry surface. During colder periods it is recommended that rolls are stored in a temperature above  $10^{\circ}$ c for 24 hours prior to use. During storage exposure to direct sunlight is to be avoided. Do not use in temperatures below  $5^{\circ}$ c.

NOTE: Rose Roofing is continually investigating methods of improving both quality and performance and therefore reserves the right to change specifications and product composition without prior notice.
